

Hydrospeed (RS1)

Community Design Number:002742379

The RS1 is an inflatable hydrospeed craft for negotiating fast flowing turbulent water. Fully inflatable, the RS1 is light and portable. The raised, rounded bow and generous buoyancy make it fast and easy to manoeuvre whether you are traveling with, across, or against fast flowing water.

The user lays flat on the board holding onto the two handles that are situated at the front of the sled and wears fins on their feet for propulsion and steering. The hydrospeed is designed to go through white water with ease and speed.

- Lightweight and easily portable
- The raised, rounded bow and generous buoyancy make it fast and easy to manoeuvre
- Can be used to travel with, across or against fast flowing water
- Can be towed by a rescue craft
- The user will have fins on their feet for propulsion and steering
- Exceptionally tough and durable
- Rapid inflation and deployment
- Minimal training, servicing and maintenance costs

Used For:

- *White water rescue*
- *Leisure*

Technical Data	RS1
Product Code	WR0218
No. Of persons	1
Length (cm)	115
Width (cm)	91
Height (cm)	50
Capacity (kg)	150
Air Requirements (ltr)	190
Pack size (cm)	67x25x20
Weight (kg)	7
Working Pressure (bar)	0.2
Recommended regulator	8 bar

Hydrospeed (RS1)
